

How to Switch Air Fusion Bases

Tabletop Base:

- **Part number for the Base Assembly:** 1-2324
- **List Price:** \$313.95

Instructions:

1. **Locate the 5 bolts** that secure the press to the base. These can be seen by looking up under the area where the pedestal attaches to the press.
 2. **Team Recommendation:** It's best to have three people for this process:
 - One person unscrews the 5 bolts while the other two steady the top of the press to prevent it from tipping over.
 - Once all bolts are removed, carefully lift and move the machine onto the tabletop base.
 3. **Final Step:** Once the press is in position on the tabletop base, go underneath and tighten the 5 bolts that were previously removed to secure the press.
-

Pedestal Base:

- **Parts you'll need:**
 - **1-2291 Pedestal Equipment Stand** (QTY 1)
 - **1-2262 Leveling Casters** (QTY 4)
- **Total List Price:** \$313.27 (plus shipping). **Note:** This is a large item and will need to ship via LTL carrier.

Instructions:

1. **Locate the 5 bolts** that secure the press to the base. These can be seen by looking up under where the base connects to the press.
2. **Team Recommendation:** It's best to have three people assist with this process:
 - One person should unscrew the 5 bolts while the other two steady the press to prevent it from tipping over.

- Once the bolts are removed, carefully lift and move the machine to the pedestal base.
3. **Final Step:** After the press is in position on the pedestal base, go underneath and tighten the 5 bolts that were removed earlier to secure the press in place.
